EDUCATION

Bachelor of Science Information and Communication Technology
Tokai University

Apr 2024 – Mar 2028 (Expected)
Tokyo, Japan

- 3rd year student, School of Information Science and Technology
- Relevant coursework: Data Structures & Algorithms, Computer Networks, Database Systems, Operating Systems, Software Engineering, Web Programming, Discrete Mathematics

EXPERIENCE

IT Support intern
Japan Airlines

Feb 2023 – Apr 2023
Tokyo, Japan

- Assisted with document registration, web-verification workflows, and passenger guidance in English and Japanese.

PROJECTS

Tutor-System
TypeScript, React 19, OpenRouter, Deepgram, Dexie/IndexedDB, Express

2025

- Built an AI learning interface for PDF reading, source-aware tutor chat, voice tutoring, and concept revision.
- Designed around study books, durable chat threads, and evidence-based learning progress tracking.

TokaiHub
TypeScript, React, Tailwind CSS, AWS Amplify, Cognito, Vite, PWA

2025

- Developed a central student portal PWA for Tokai University with mobile-first UI and bilingual support.
- Integrated custom AWS Cognito authentication and SES-backed OTP verification flows.

WebDrop
HTML, CSS, JavaScript, Node.js, WebRTC, OPFS, Service Worker

20242025

- Built a mobile-first nearby file-sharing app using WebRTC RTCDataChannel and OPFS chunked streaming.
- Implemented ultrasonic Web Audio chirp exchange and motion sensors for proximity verification.

Codex Account Switcher
Swift, AppKit, macOS Menu Bar, Process Control

2025

- Created a native macOS menu-bar utility to switch active Codex profiles and hot-swap session tokens.
