

Mohamed Fuad

080-7535-2988

EDUCATION

Tokai University
Bachelor of Science Information and Communication Technology
• 3rd year student, School of Information Science and Technology
• Relevant coursework: Data Structures & Algorithms, Computer Networks, Database Systems, Operating Systems, Software Engineering, Web Programming, Discrete Mathematics

Apr 2024 – Mar 2028 (Expected)
Tokyo, Japan

EXPERIENCE

Japan Airlines
IT Support intern
• Assisted with document registration, web-verification workflows, and passenger guidance in English and Japanese.

Feb 2023 – Apr 2023
Tokyo, Japan

PROJECTS

Tutor-System | TypeScript, React 19, OpenRouter, Deepgram, Dexie/IndexedDB, Express
• Built an AI learning interface for PDF reading, source-aware tutor chat, voice tutoring, and concept revision.
• Designed around study books, durable chat threads, and evidence-based learning progress tracking.

2025

TokaiHub | TypeScript, React, Tailwind CSS, AWS Amplify, Cognito, Vite, PWA
• Developed a central student portal PWA for Tokai University with mobile-first UI and bilingual support.
• Integrated custom AWS Cognito authentication and SES-backed OTP verification flows.

2025

WebDrop | HTML, CSS, JavaScript, Node.js, WebRTC, OPFS, Service Worker
• Built a mobile-first nearby file-sharing app using WebRTC RTCDataChannel and OPFS chunked streaming.
• Implemented ultrasonic Web Audio chirp exchange and motion sensors for proximity verification.

20242025

Codex Account Switcher | Swift, AppKit, macOS Menu Bar, Process Control
• Created a native macOS menu-bar utility to switch active Codex profiles and hot-swap session tokens.

2025
